

Windows® Phone Marketplace

Certification Exception Request

Version 1.5

July 2012

Use this document to apply for exceptions for technical requirements or application/content policies for Windows Phone Marketplace certification. Note that the exception requests can require several days to review, which can delay application certification testing completion. You can upload the completed Certification Exception Request form with the application during the application submission.

Exception requests will only be considered when sent using this form and sent by a registered Marketplace developer for a specific application. Only one form is required if you have multiple exception requests for a single application. Submitting an exception request does not guarantee its approval.

Steps to submit the Technical Exception form:

1. Complete each required field in the exception request form in detail. Up to seven exceptions can be requested, however, it is advised to limit the number of exception requests to a minimum.
2. Upload the completed exception request form during the application submission. In order for the exception to apply, it needs to be uploaded along with the respective application during the Marketplace submission process.

(* Required field)

Application Submission Information	
Application Name*	
Application Version*	
Developer or Company Name*	
Windows Live® ID Email Address used for Marketplace Registration*	
Phone Number	
Email Address (if different from the Windows Live ID above)	
Exception ID (if already approved)
